GENERAL SPECIFICATIONS

Degree of protection : NEMA 4X, IP66/IP67

Wiring conduit : See "Model & Suffix Code".

Electrical connection : M3.5 screw terminals (torque 0.8 N-m)

Materials

Transmitter housing : Flame-resistant resin (black)

Screw terminals : Nickel-plated brass

Enclosure :

Diecast aluminium standard (polyurethane coated) or stainless steel casting (equivalent to type 316, epoxy resin coated).

Functions & Features

- Universal input: mV, V, T/C and RTD
- High accuracy
- HART communication
- Intrinsically safe and explosion-proof approval
- CE marking (conforms to ATEX and EMC)
- Optional stainless steel enclosure
- Programming via hand-held communicator or via PC
- A wide variety of T/C and RTD types
- Self diagnostics
- Input-output isolated

Enclosure color :

Body : Silver

Cover : Blue (equivalent to Munsell GPB3.5/10.5)
Silver for stainless steel

Mounting bracket assembly :

Stainless steel 304

Applicable pipe :

1" 1/2 min.; 2" max.

Isolation :

Input to output to outdoor enclosure

User-configurable parameters :

- Input sensor type
- Number of wires (RTD)
- Input range
- Output range (via HART® only)
- Output calibration
- HART communication mode
- HART network mode

Burnout (T/C & RTD) :

Upscale, downscale or no burnout selectable (standard: upscale);

Also detects wire breakdown and overrange input exceeding the electrical design limit for DC input.

Cold junction compensation (T/C) :

CJC sensor incorporated

Damping time :

0 to 30 sec. (standard : 0)

LCD DISPLAY (option)

Features:

- Indicates and sets input signal, engineering unit and transmitter status.
- Removable while the module is powered.

Display size: 36 × 20 mm (1.41" × 0.79")

Characters:

Color: Black

Format: 2 rows of 5 alphanumeric characters;
Top: 7.4 mm high
Bottom: 6.5 mm high
6 status characters, 1.9 mm high

Display range:

-99999 to 99999

Decimal point:

Top row only; positioned between two characters

Read rate: 150 msec.

Back light: None

HART® COMMUNICATION

Protocol:

HART® communication protocol

HART® address range:

0 – 15 (standard: 0)

Transmission speed: 1200 bps

Digital current:

Approx. 1mA p-p when communicating

Character format:

1 Start Bit, 8 Data Bits, 1 Odd Parity Bit, 1 Stop Bit

Distance:

1.5 kilometers (0.9 mile)

HART® communication mode:

Master-Slave Mode and Burst Mode (standard: Master-Slave)

HART® network mode:

Point-to-Point Mode and Multi-drop Mode; automatically set to Multi-drop Mode when the address is set to other than 0.

INPUT

The input is factory set for use with 3-wire Pt 100, 0 to 150°C. See Table 1 for the available input type, the minimum span and the maximum range.

■ DC mV & V

Input resistance: 1MΩ minimum

■ THERMOCOUPLE

Input resistance: 1MΩ minimum

Burnout sensing: 130nA ±10%

■ RTD (2-wire, 3-wire or 4-wire)

Input resistance: 1MΩ minimum

Excitation: 0.2mA ±10%

Allowable leadwire resistance: Max. 20Ω per wire

OUTPUT

Output range: 4 – 20mA DC

Zero adjustment: 3.8 – 7.2mA (standard: 4mA)

Span adjustment: 12.8 – 17.6mA (standard: 16mA)

Operational range: 3.8 – 21.6mA

Load resistance vs. supply voltage:

Load Resistance (Ω) = $\frac{\text{Supply Voltage (V)} - 12 \text{ (V)}}{0.024 \text{ (A)}}$
(including leadwire resistance)

INSTALLATION

Supply voltage:

12 – 42V DC (non-approved)

12 – 28V DC (approved)

Operating temperature:

-40 to +85°C Electronics

(See Safety Parameters for use in a hazardous location.)

-30 to +80°C Display (full visibility)

Operating humidity:

0 to 95% RH (non-condensing)

Dimensions:

See External Dimensions.

Weight:

FRC0: Approx. 150 g including the LCD

FRC1: Approx. 1.3 kg

FRC2: Approx. 4.0 kg

PERFORMANCE

Accuracy:

See Table 1 and "Explanation of Terms"

Cold junction compensation error: ≤ ±0.5°C

Temperature coefficient:

±0.015%/°C of max. range at -5 to +55°C

T/C and DC mV: ±0.015%/°C at -40 to +85°C

Pt 100, span ≥ 100°C: ±0.015%/°C at -40 to +55°C

±0.03%/°C at 55 to 85°C

Start-up time: Approx. 8 seconds

Response time:

1 second (0 – 63%) with damping time set to 0 and when not communicating via HART®.

Supply voltage effect:

±0.003% × [Output Span] / 1V

Insulation resistance:

≥100MΩ with 500V DC (input to output)

Dielectric strength:

1500V AC /1 minute (input to output to outdoor enclosure)

STANDARDS & APPROVALS

CE conformity: ATEX Directive (94/9/EC)

Ex ia EN 50020

Ex d EN 60079-1

EMC Directive (2004/108/EC)

EMI EN 61000-6-4

SAFETY PARAMETERS

Operating temperature for CENELEC (ATEX):

T4 -40 to +80°C

T5 -40 to +65°C

T6 -40 to +50°C

Ex-data:

Ui	30V DC	Uo	6.4V DC
li	96mA DC	Io	30mA DC
Pi	0.72W	Po	48mW
Ci	0 μF	Co	20 μF
Li	0 mH	Lo	10 mH

EXPLANATIONS OF TERMS

■ ACCURACY

This transmitter's accuracy is theoretically defined as the addition of A/D and D/A conversion errors:

$$\text{Accuracy} = \text{A/D Conversion Error} + \text{D/A Conversion Error}$$

The A/D conversion error means that measured as HART signal which is A/D converted from the analog input signal.

The D/A conversion error of this transmitter is relatively very small so that it does not really affect the unit's overall performance.

The "Accuracies" given in Table 1 therefore equals the A/D conversion error.

The temperature drift (coefficient) or the cold junction compensation error is not included in the "Accuracy."

■ CALCULATION EXAMPLES OF OVERALL ACCURACY IN %

• DC Voltage

1) 0 – 200mV

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 40\mu\text{V} \\ 40\mu\text{V} / 200000\mu\text{V} \times 100 & = 0.02 \% < 0.1\% \end{aligned}$$

⇒ Overall accuracy = ±0.1% of span

2) 0 – 4mV

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 10\mu\text{V} \\ 10\mu\text{V} / 4000\mu\text{V} \times 100 & = 0.25 \% > 0.1\% \end{aligned}$$

⇒ Overall accuracy = ±0.25% of span

• Thermocouple

1) K thermocouple, 0 – 1000°C

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 0.25^\circ\text{C} \\ 0.1\% \times 1000^\circ\text{C} & = 1^\circ\text{C} > 0.25^\circ\text{C} \end{aligned}$$

$$\begin{aligned} \text{CJC error (0.5}^\circ\text{C) added: } & 1 + 0.5 = 1.5^\circ\text{C} \\ 1.5^\circ\text{C} / 1000^\circ\text{C} \times 100 & = 0.15 \% \end{aligned}$$

⇒ Overall accuracy including CJC error = ±0.15% of span

2) K thermocouple, 50 – 150°C

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 0.25^\circ\text{C} \\ 0.1\% \times (150 - 50)^\circ\text{C} & = 0.1^\circ\text{C} < 0.25^\circ\text{C} \end{aligned}$$

$$\begin{aligned} \text{CJC error (0.5}^\circ\text{C) added: } & 0.25 + 0.5 = 0.75^\circ\text{C} \\ 0.75^\circ\text{C} / (150 - 50)^\circ\text{C} \times 100 & = 0.75 \% \end{aligned}$$

⇒ Overall accuracy including CJC error = ±0.75% of span

• RTD

1) Pt 100, -200 – 800°C

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 0.15^\circ\text{C} \\ 0.15^\circ\text{C} / (800 - (-200))^\circ\text{C} \times 100 & = 0.015 \% < 0.1\% \end{aligned}$$

⇒ Overall accuracy = ±0.1% of span

2) Pt 100, 0 – 100°C

$$\begin{aligned} \text{Absolute value accuracy (Table 1): } & 0.15^\circ\text{C} \\ 0.15^\circ\text{C} / 100^\circ\text{C} \times 100 & = 0.15 \% > 0.1\% \end{aligned}$$

⇒ Overall accuracy = ±0.15% of span

INPUT TYPE, RANGE & ACCURACY

■ INPUT TYPE, RANGE & ACCURACY

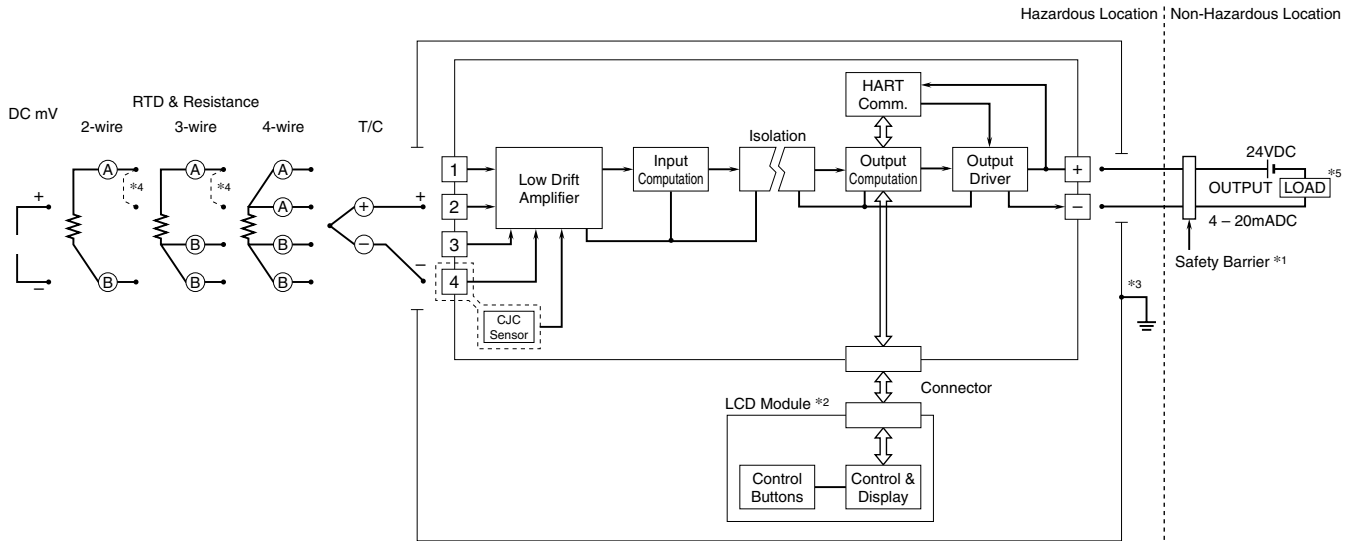

TABLE 1

INPUT TYPE	MIN. SPAN	MAXIMUM RANGE	ACCURACY					
DC mV & V	4mV	-50 to +1000mV	±0.1% or ±10μV, whichever is greater (F.S. input ≤50mV) ±0.1% or ±40μV, whichever is greater (F.S. input ≤200mV) ±0.1% or ±60μV, whichever is greater (F.S. input ≤500mV) ±0.1% or ±80μV, whichever is greater (F.S. input >500mV)					
Thermocouple	°C				°F			
	MIN. SPAN	MAXIMUM RANGE	CONFORMANCE RANGE	ACCURACY *1	MIN. SPAN	MAXIMUM RANGE	CONFORMANCE RANGE	ACCURACY *1

P (Platinel II)	0 to 1395	0 to 1395	±0.25	36	32 to 2543	32 to 2543	±0.45	
RTD	°C				°F			
	MIN. SPAN	MAXIMUM RANGE	ACCURACY *2	MIN. SPAN	MAXIMUM RANGE	ACCURACY *2		
Pt 100 (JIS '97, IEC)	20	-200 to +850	±0.15	36	-328 to +1562	±0.27		

*1. [Accuracy or ±0.1% of span, whichever is greater] + Cold Junction Compensation Error 0.5°C

*2. Or ±0.1% of span, whichever is greater. (For 2- or 3-wire RTD, the value is valid by the sensor calibration after the wiring is done.)

SCHEMATIC CIRCUITRY & CONNECTION DIAGRAM

- *1. A safety barrier must be installed for the intrinsic safety. The safety barrier must meet the Ex-data of this unit and must be approved for the hazardous location.
- *2. Optional
- *3. Be sure to earth the unit's enclosure to meet the intrinsic safe or explosion-proof (flameproof) requirements.
- *4. Close across the terminals 1 & 2 for 2-wire/3-wire RTD input.
- *5. Limited to 250 – 1100Ω for HART communication.

EXTERNAL DIMENSIONS & MOUNTING REQUIREMENTS unit: mm (inch)
